Precursor Systems

Save $$, add features, with a Mac mail server

Customer was quoted $12,000+ to upgrade a crashing Windows server!

The customer had been using a Windows Exchange server had a very small database limit. Every 3-6 weeks the database would hit that limit and have to be rebuilt. The rebuild process took about 10 hours and usually resulted in the company mail server being down for the day.

Precursor was able to offer the customer a Mac-based email solution with the following advantages over the existing server:

– Database size is now limited only by hard drive size –not licensing fees
– Production staff can now share Outlook calendars with Mac-based designers
– Built-in virus checking of email at the server
– Built-in anti-spam control at the server.

The icing on the cake?
Precursor's Mac-based solution saved the customer over $8,000!

Feature	Existing Windows server	New Macintoh server
database size limit	16 GB	400 GB or hard drive
mac/pc share calendars	No	Yes
Anti-virus built-in	No	Yes
Anti-spam built-in	No	Yes

Precursor Systems was founded in March 1994 by Alex Narvey to provide support for computer-based professionals in the Publishing, Printing, Prepress, Digital Imaging, Audio and Video industries.
