

Xserve + Macs = uptime up; downtime down

Customer's support guy was needed hours every week to maintain convoluted Windows/Linux server system!

The customer was tired of endless visits –and invoices– to support a convoluted set of Windows and Linux servers that no-one on staff could understand. Precursor Systems recommended a powerful Apple xServe offering a single, intuitive interface for all server functions with no licensing fees! A raft of unreliable Windows desktops were replaced with Mac minis and, Voila! An all Mac network with Mail, File, Web and Print services that could be administered in a simple and easy-to-use Graphic User Interface.

Precursor Systems was founded in March 1994 by Alex Narvey to provide support for computer-based professionals in the Publishing, Printing, Prepress, Digital Imaging, Audio and Video industries.
