Precursor Systems

Precursor.ca Now a Certified Maxum Partner

Contact: Alex Narvey

Precursor Systems is pleased to announce that we have been accepted as a Certified Maxum Partner.

Precursor has been using Maxum products like NetCloak since 1995 and over the years we have set up many of our customers with Maxum's excellent FTP Server software: Rumpus. Rumpus is a high performance FTP Server software package that features a web-file interface that allows any client to transfer files via FTP without ever needing FTP client software.

While FTP is simplicity itself in terms of file transfer, FTP client software is not and often requires a level of customer support that is burdensome. With Maxum's Rumpus that all goes away as the end user only requires a web browser on any platform in order to both upload and download files via FTP. Rumpus even allows you to manage the FTP site without the need for an FTP client software package.

"Using Rumpus FTP Server allows our customers to move large files to and from their clients and providers with ease." said Precursor founder Alex Narvey, "We are very pleased to complete the loop and be able to offer Rumpus directly through our online store at software.precursor.ca.

Precursor Systems was founded in March 1994 by Alex Narvey to provide support for computer-based professionals in the Publishing, Printing, Prepress, Digital Imaging, Audio and Video industries.
