Precursor Systems Offers Managed Software Solution

Contact: Alex Narvey

Precursor Systems is pleased to announce that we now offer a managed software solution to our Precursor Support Plan clients.

Standard users cannot install software on their device without the assist of an Administrator and are therefore protected from acquiring various malwares and incompatible products and updates which can compromise their device and its productivity and in worst case scenarios affect their network and surrounding devices.

While this "old school" methodology secures networks it can also lead to user frustration and diminishing productivity.

Managed Software Center protects your network yet empowers your employees by allowing them to acquire vetted Apple and 3rd party software and apply approved updates without the requirement to be an admin user.

Precursor's Managed Software Center is based on the Munki project pioneered at Disney Animation Studios. We have customized the Precursor version to the needs of our Precursor Support Plan customers.

Precursor Systems was founded in March 1994 by Alex Narvey to provide support for computer-based professionals in the Publishing, Printing, Prepress, Digital Imaging, Audio and Video industries.
