Precursor Systems

Precursor's Narvey presents at MacDevOps YVR

Contact: Alex Narvey

Precursor Systems is pleased to announce that company founder Alex Narvey will present a 5 minute "QuickTalk" at the MacDevOps YVR conference this week.

MacDevOps YVR conference, now in its sixth year, will be all online this year due to travel restrictions. Using an innovative mix of technologies, conference organizer Mat Xavier has presentations salted for a Youtube channel, the "hallway" track will taking place using the app Discord, and the workshops will facilitated by using Zoom.

Alex has presented quicktalks at the last two MacDevOps conferences and this year will be showing his automated triage system that uses REST API calls to integrate Zendesk with Trello.

"MacDevOps has been so inspiring to me in the past and I am thrilled to present my little auto-triage project which was directly inspired by the talk of Kanban Boards at last year's conference." said Precursor founder Alex Narvey.
