# Remote Backup Calculator 1.0.2

Remote Backup Calculator is a FileMaker Go solution for iOS which estimates the amount of time it will take to perform an internet backup based on your upload speed.
**FileMaker Go 15** for iOS is free!
https://www.claris.com/filemaker/go

**Installation**

1) email the database **Backup_Calc.fmp12** to your iOS device. Then tap the attachment in the email message and select "Copy to FileMaker Go"

Now you can open up the solution from within FileMaker Go.

2) email the profile **Backup_Calc.mobileconfig** to your iOS device. Then tap the attachment and install the Profile. The Profile will put a web clipping icon on your iOS springboard so that you can launch the solution from the Home screen. When you tap the icon it will produce a dialog that asks whether you want to open it in FileMaker Go.

Enjoy.
