
FreeHand 4.0b Update – 700% Improvement!

Aldus has updated FreeHand to 4.0b. The new version speeds up the transformation of objects and groups of objects by 700%! Of course, the updater files for U.S. and International English versions are available on Precursor BBS. [Go Files:Aldus from the Precursor BBS Desktop] .

RAMDoublor 1.5 now PowerPC Compatible

Connectix has updated RAMDoublor, its RAM doubling utility to version 1.5. The new version is now PowerPC compatible. The updater is available on Precursor BBS. [From the Precursor BBS Desktop go Files:Macintosh Stuff:Updates]

Adobe Type Ships Manager 3.8 for PowerPC!

One of the main PowerPC bottlenecks has been overcome as Adobe is now shipping the PowerPC native version of Type Manager. Read all about the details on Precursor BBS. Go Files:Adobe from the Precursor BBS Desktop]

Comp.Sys.Mac Newsgroups on-line!

Precursor Systems is pleased to announce we are now providing Macintosh oriented newsgroup coverage on our BBS. Hundreds of interesting and informative messages covering Mac hardware and software topics appear in these forums every day making them an extremely valuable resource. The Internet newsgroups are available only to Precursor's Business/Support class members.
This is the first phase of our Internet implementation. General Internet service and e-mail is not currently supported. For more information, call Precursor at 992-3100.
