
System 7.5 Update 1.0 !!

Apple has released an update to System 7.5 called System 7.5 Update 1.0. The Update comes on 4 High Density floppy disks. A few of the enhancements include: improved handling of low-memory situations, faster file sharing, the ability to turn off the computer using the keyboard Power On key, and the addition of Macintosh Drag and Drop support to the Launcher so that it is easier to add or remove items. Apple Guide is now PowerPC native and its performance is also improved for 680x0 Macs. PowerTalk, Version 1.1.1 includes several performance improvements as well as an update to the guided tour, a new version of the direct dial-up utility, and new or revised versions of several PowerTalk gateways that provide interoperability between PowerTalk and communications services.

System 7.5 Update 1.0 has been uploaded to Precursor BBS in Files:Apple Stuff:Updates & Utils and will be made available pending notification from Apple Electronic Software Distribution.

LaserWriter 8.2.2 !!

Apple has released LaserWriter 8.2.2 to replace version 8.2 and all earlier versions of the LaserWriter 8 software driver. Apple Recommends that all users upgrade to this latest version. The new version and a Read Me file listing improvements is available to members on the Precursor BBS [from the Precursor BBS Desktop go Files:Apple Stuff:Print Drivers]

QuickDraw GX 1.1.1 !!

In conjunction with the release of System 7.5 Update 1.0, Apple has released an improved version of QuickDraw GX. The new version is 1.1.1 (version 1.1 was immediately withdrawn after a cosmetic flaw was detected). QuickDraw GX 1.1.1 is completely PowerPC native and offers significant performance improvements in the areas of styled text, font down-loading, dialog speed and management of large character-set fonts. Many improvements to the user interface include better support for encapsulated PostScript output.

QuickDraw GX 1.1.1 has been uploaded to the Precursor BBS in Files:Apple Stuff:Print Drivers and will be made available pending notification from Apple Electronic Software Distribution.
