## LaserWriter 8.3 Vastly Improved!

Apple has made major improvements to the LaserWriter driver with the release of version 8.3 which give users many of the powerful features of QuickDraw GX without the attendant incompatibilities. The new LaserWriter now offers desktop printers and desktop print management. By clicking on a desktop icon you can now manage your print queue by dragging print jobs up and down the queue and even from one printer's icon to another! The new LaserWriter driver is available in our Apple software conference. [From the Precursor BBS Desktop go Files:Apple Stuff:Print Drivers].
