

September BBS Sale Almost Over!

The special sale on our Business Level BBS subscription (\$150 down from a regular price of \$325), is almost over. We hope you consider taking advantage of the over 50% savings before September 30.

Don't forget to download the latest BBS settings file. Precursor BBS version 2.7 has support for many new conferences and features including our new Internet port areas. The new settings file is available on the Precursor BBS in the Important! folder and can be downloaded via ftp on the internet from our World Wide Web site at:

http://www.precursor.mb.ca/Support/Pre_BBS.html The direct ftp address is:
ftp://ftp.precursor.mb.ca/pub/precursor/BBS_2.7.sit.hqx

Apple Fixes Desktop Printing!

Those of you using LaserWriter 8.3 with its desktop printing capabilities will be pleased to know there is an update to fix potential problems with new PowerMacs. The Desktop Printing Software 1.0.3 Update is now extensions manager compatible and avoids error problems when printing without virtual memory on the new PCI Macintoshes. The update is available on the Precursor BBS in our authorized Apple Software conference. [From the Precursor BBS desktop go Files:Apple Stuff:Print Drivers].

Apple Telecom 2.3!

Apple has released an update to the GeoPort software to fix bugs and supports new computers. The updated includes two disk images for Telecom 2.3 and Fax Software 2.3. You can get the update on the Precursor BBS in Files:Apple Stuff:Updates & Utils.

Syquest/SilverLining Lite 1.0.1

Syquest has licensed a special version of La Cie SilverLining to support all variants of Syquest removable data cartridges — including the new EZ135 drive. The new SilverLining Lite Control Panel is available on the Precursor BBS in our Files:Utilities Stuff conference.

Speed Doubler 1.0.2 Update!

If you own a Power Macintosh 6100, 7100 or 8100 computer then Connectix has THE utility for you. Speed Doubler is a set of extensions that offers dramatic speed improvements in many areas. (Speed Doubler is in use on Precursor's new Web Server at <http://www.precursor.mb.ca>). Connectix is now shipping its second maintenance update to the utility called Speed Doubler Updater 1.0.2. The 1.0.2 Updater is available on the Precursor BBS – from the Precursor Desktop go Files:Updaters Stuff.
