
QuarkXPress 3.32!

On December 22nd, Quark released the long awaited 3.32 update for XPress. Version 3.32 provides updated word processing import filters for MS Word and WordPerfect, allows you to generate Collect for Output information without collecting files, and support for Windows 95 files. It also supports optimized EPS files from PhotoShop, fixes certain TIFFs, CMYK TIFFS, and Apple Events problems, fixes a Courier font substitution problem for TrueType, and corrects problems with the Pantone Professional Color Toolkit.

QuarkXPress 3.32r2 Updater is a two disk set for 68K Macs and a four disk set for PowerPC Macs. Both updaters are available on the Precursor BBS (Files:Quark Stuff). As a special service to Precursor Support Plan customers, Alex Narvey can be scheduled for a service call to install the 3.32r2 updater at no charge. [This service for Support Plan customers only].

Apple LaserWriter 8.3.2!

Apple has shipped a four disk set of LaserWriter 8.3.2 installer disks which consolidate several pieces of software. Included are the latest version of the LaserWriter 8 driver, the Desktop Printing Software 1.0.3 update, and the System 7.5.2 Printing Update 1.1. The four disk set is available on-line on the Precursor BBS in our licensed Apple software conference [From the Precursor BBS Desktop go Files:Apple Stuff:Print Drivers]

Built-in Ethernet 1.0.2 (for PCI Macs)!

Apple has released an update to its Built-in Ethernet software for the Power Macintosh 7200, 7500, 8500, and 9500 systems. The Built-in Ethernet Fix is available on the Precursor BBS in our licensed Apple software area Files:Apple Stuff:Updates & Utils.

FreePPP 1.0.4!

The FreePPP Group has released version 1.0.4 of the FreePPP extension. The new version provides Password and User ID prompting and fixes bugs that caused version 1.0.3 to be recalled. The package also includes a list of recommended modem init strings. FreePPP 1.0.4 is available on the Precursor BBS in our special Internet area Files:Internet Stuff:TCP/IP.
