Apple Announces Studio (Flat Panel) Display!

Take back your desk space as you kiss your Cathode Ray Tube goodbye! Apple has announced a new flat panel display with amazing specs that will ship in May. The new Apple Studio Display features a flat panel display said to be more precise, brighter and better focused than your existing C.R.T. display. The 15" unit actually has the viewable area of most 17" monitors. Check it out at:
