Precursor Systems New Catalogue!

The latest Precursor Systems Catalogue of Support Services is now available. Designed to take us into the millenium, this new catalogue offers both new services and refinements to old ones. For example, we now offer Software Audits.

After five years in business, we have finally found it necessary to adjust our pricing schedules and are pleased to offer even greater discounts at our highest level of support.

Call us now and ask for your new catalogue or email us at:

Appleshare IP 6.2

Apple's excellent server software has been updated to version 6.2. Originally slated to be a paid upgrade Apple has relented and is offering it as a free download to version 6.x owners ($499 US to upgrade from versions <6). The update offers Mac OS 8.6 compatibility, a variety of needed bug fixes, and a strong set of feature improvements:
http://asu.info.apple.com/swupdates.nsf/artnum/n11432
For those who purchased version 6.1 between April 19 and June 19, 1999 a coupon is available for an ASIP 6.2 CD at the cost of shipping and handling

iMac Firmware Update 1.2

Apple has released an improvement to iMac firmware to take care of netbooting issues under Mac OS X Server. Other improvements are included:
http://asu.info.apple.com/swupdates.nsf/artnum/n11177

Norton Utilities 4.0.4

Symantec has released a new updater to Norton Utilities to take care of two problems. 1) special problems with 333MHz iMacs and 2) special problems with disk formatted with Anubis and APS PowerTools software. The update works on version 4.0.3 only. Precursor Systems strongly recommends using the Custom installation since the Easy Install option appears to miss items.

(As usual, this upgrade will be carried out automatically at the next scheduled service period for Precursor Customers who already own version 4.x of NUM).
