Precursor PDF News

QuarkXPress 4.1!

As we reported in *Precursor PDFNews* 11:06, Quark has finally begun shipping the 4.1 updater to registered users. Some Canadian users have already received their update in the mail. If you haven't, Quark has also posted the update on-line (see below).

The update is easy to install. However, Quark 4.1 may do a few strange things upon launch and we ask Precursor support plan customers to let us install the update for you to take care of these glitches before they happen. (This can be carried out at your next scheduled maintenance visit by request).
