
SPECIAL precursor.ca EDITION!!!

Now "precursor.ca"

Precursor Systems is now using the top level domain **precursor.ca**.

Due to changes in the Canadian domain name registry system that occurred November 1, our email address and web page URL are now as follows:

email support@precursor.ca

web <http://www.precursor.ca>

Please request one of our new business cards during our next visit!

GraphicConverter 4.0

The greatest shareware program since Stuffit, Lemke software's GraphicConverter is a must have for anyone working with images on the web. It imports 130 file formats and exports to 40 formats. Version 4 offers a passle of feature additions to this powerful program.

Quark/Photoshop 6 Bug

QuarkXPress will not recognize EPS clipping paths from the new Photoshop 6. The only workaround is to save the Photoshop file back to version 5.5 or ealier. When Quark and Adobe get through arguing over who bears responsibility someone might get around to fixing the problem.

Eradicator 1.6 Helps Photoshop 6

Eradicator is a must-have utility for Mac OS 9 users. It deletes invisible Temporary Folder items that Mac OS 9 fails to dispose of. (These files can grow to take over your disk and are otherwise invisible). Version 1.6 now also deletes files in the Mac OS 9 invisible "Cleanup At Startup" Folder which the Photoshop 6 scratch disk feature is improperly handling.

ATI Radeon 1.0

ATI has brought out driver software for its new Radeon graphics card which is backwards compatible with its RAGE 128 Mac products such as: RAGE ORION; NEXUS 128; and, XCLAIM VR 128. The driver is only qualified for Mac OS 9. ATI cautions against using it with earlier products such as: XCLAIM GA; NEXUS GA; XCLAIM 3D PLUS; and, XCLAIM VR.
