## Adobe Illustrator 9.0.1

Adobe has finally released an updater for Illustrator 9 which fixes a whole slew of problems. In fact, the 20 MB update almost sets a record for thoroughness. You can download an 11 page PDF file that details the fixes in alphabetical order. This update is highly recommended and we will be pleased to install it at your next Precursor maintenance visit. (If you are required to FlightCheck Illustrator 9.01 documents you will want to get the latest version of FlightCheck – see *Precursor PDFNews* 14/01).

## Netscape 6

AOL owned Netscape has finally released version 6 of Communicator. With its new Geko engine it offers greatly improved performance and much more comprehensive web standard calls. However, the internet is already abuzz with compatibility problems. Precursor Systems does not recommend this installation.
