## Apple QuickTime 5.0.1

Apple has released QuickTime 5.0.1. The new version includes an enhanced user-interface with new audio controls, "Hot Picks" guide and QuickTime TV (QTV) channels display; a new DV codec for enhanced speed and quality; the ability for content creators to design custom interfaces for the delivery of their QuickTime content; and a component downloader to add Apple's own enhancements as well as third-party plug-ins on the fly. QuickTime 5 also offers full support for MPEG-1, Flash 4 and QuickTime's new Cubic VR technology. As usual there are both online and standalone installers available:

<http://www.apple.com/quicktime/download/>

<http://www.apple.com/quicktime/download/standalone/>

If you are using a Pro key purchased for QuickTime 3/4 before October 2000 you will need to purchase a new QuickTime Pro key from the AppleStore Canada for \$44.95.

---

## Toast Titanium 5.0.1

The latest version of Toast from Roxio offers compatibility with iTunes and Disc Burner, and support for some new CD recorders, as well as fixing some minor compatibility issues with the Apple Superdrive. Toast 5.0.1 will also allow you to use your built in CD-RW drive as both source and destination in the Copy format.
