

Mac OS X 10.0.2

Apple has released a second update to Mac OS X. The new 10.0.2 update—available through the Software Update control panel—provides performance improvements and adds the capability to burn CDs in the OS X environment. This comes in handy if you also update to iTunes 1.1.1 for Mac OS X which is also available through Software Update.

Apple's New iBook

Apple introduced a new iBook model at a special press event May 1. The new iBook sheds 2 pounds and is styled like a mini Titanium PowerBook G4. Although screen size is still 12" diagonal it now supports 1024x768 resolution. The new design is also smaller in every dimension which vastly increases its mobility. Very nice. The base model also sheds \$200 in sticker price. All iBooks are now 500 MHz G3s. You can customize yours with either a CD ROM, DVD ROM, CDRW or a new combo DVD/CDRW drive.
