## MACWORLD EXPO SPECIAL EDITION !!!

---

### Mac OS X 10.2 Jaguar – August 24<sup>th</sup>

The big item at this summer's Macworld Expo was Mac OS X 10.2. Steve Jobs gave a long demo of its many new features and announced it would be available August 24th for \$199 CDN. (There is no special upgrade pricing save that for those who purchase between July 17 and August 24 and will be eligible for Mac-Up-To-Date CD at \$29.95 CDN). Mac OS X 10.2 is bursting with improvements at the consumer end of things including new freely downloadable technologies like iSync and iCal. For digital publishers the main items of interest will be the Rendezvous I.P. self-discovery technology which will simplify printing, and the new multi-threaded Finder and the Quartz Extreme graphics engine which will greatly improve performance. There are over 100 other improvements!

---

### 17" widescreen iMac

At Macworld Expo Apple introduced a new member of the flat panel iMac family. The new top end iMac now sports a beautiful 17" cinematic aspect ratio flat panel display with a tantalizing 1440 x 900 pixel resolution. Also upgraded is the graphics engine which in this model gets NVIDIA GeForce4 MX (as opposed to the 15" iMac's NVIDIA GeForce2 MX).

---

### QuickTime 6

The day before the Expo keynote, Apple released the long-awaited QuickTime 6. The new version supports the high performance MPEG 4 video codec, AAC (Advanced Audio Coding) Audio support which makes smaller yet higher quality audio files than MP3, improved skip protection, and more...

Apple also announced QuickTime Broadcaster live encoding software.

---

### RealOne Player for X (9.0)

Not to be outdone by QuickTime 6, Real Networks finally released a beta of the RealOne Player for Mac OS X. The new RealOne standard is said to practically eliminate buffering over high-speed connections so your clips start faster and play smoother.

## QuarkXPress 5.0.1 Update, Discounts

Quark has a bug fix available for version 5. There is still no word on an OS X native version. And, in other Quark news: the company appears to be discounting Quark 5 upgrades quite heavily. In June, Quark sent out email offers of \$100 US reductions in Quark 5 upgrades. Apparently due to the slow take up rate, in July Quark began emailing special offers of 50% discounts on not only Quark Upgrades but of full retail product when purchased through the Quark store online. Check your email today!

---

## Apple Security Update 7-18-02

Apple has tightened up security on the Software Update mechanism of OS X. The update is available through the Software Update mechanism of System Preferences or via direct download. A separate download for Mac OS X 10.1 is required.

---

## Microsoft Security Updates

Microsoft has tweaked Internet Explorer (version 5.2.1 for OS X and 5.1.5 for Classic) and Outlook Express 5.0.5 to take care of all known security issues.
