

Apple's New G4s

Did we mention that Apple has refreshed the G4 line-up? The whole line is now dual-processor. That's right! Two processors for the price of one! (Acutally, this edition of PDFNews is being written on one). Enhancements also include beefed up hard drive capacity/buses, faster RAM specs, and a second 5-1/4" optical bay. And of course, the new G4s come with Mac OS X 10.2 Jaguar pre-installed.
