

New iMacs

Apple introduced new iMacs today. While the base 15" model remains an 800 MHz processor with 100 MHz bus and regular AirPort the new 17" model boasts a 1 GHz G4, a 133 MHz bus, a SuperDrive, and the ability to take the new built-in AirPort Extreme and Bluetooth modules that have appeared on the new Power Mac G4 (see Precursor PDFNews 17/02). It is not clear if the base model will still boot into OS 9 but it is a certainty that the new 17" 1GHz model will not. Prices are \$1999 for the 15" and \$2799 for the new 17".
